Read the text and answer the questions:

Children in Africa wake up very early to go to school. There aren't many schools and some children walk a long way to get there. The most important subjects are reading and writing. There are 40 to 60 pupils in a classroom and only one teacher! Many are very poor and can't go to school because they must help their parents at home.

In France, schools are very modern. Many children use computers during their lessons. At school, students learn how to read, write and solve maths problems, but they also learn how to prevent accidents and how to save a person's life in case of emergency. At the end of primary school, they receive a certificate.
